[ENG] Orca BT is constructed from a mix of sharp serifs and outward brushstrokes that create a dynamic combination of angular and curved lines. Its tall x-height, moderate ascenders and descenders, as well as wide proportions make it suitable for display text and labels. The Orca BT family has a Display style and also an accompanying italic version, which is intended to make the family usable in extensive reading texts.

[ESP] Orca BT se construye a partir de una mezcla de serifas agudas y trazos pincelados de salida que crean una dinámica combinación de líneas curvas y angulares. Su altura de "x" alta, ascendentes y descendentes moderados y sus amplias proporciones la hacen adecuada para la visualización de textos y etiquetado. La familia Orca BT cuenta con un estilo Display y también un corte acompañante itálico, con esto se busca expandir la familia para ser usada en textos de lectura extensa.

[ENG] Orca BT is constructed from a mix of sharp serifs and outward brushstrokes that create a dynamic combination of angular and curved lines. Its tall x-height, moderate ascenders and descenders, as well as wide proportions make it suitable for display text and labels. The Orca BT family has a Display style and also an accompanying italic version, which is intended to make the family usable in extensive reading texts.

[ESP] Orca BT se construye a partir de una mezcla de serifas agudas y trazos pincelados de salida que crean una dinámica combinación de líneas curvas y angulares. Su altura de "x" alta, ascendentes y descendentes moderados y sus amplias proporciones la hacen adecuada para la visualización de textos y etiquetado. La familia Orca BT cuenta con un estilo Display y también un corte acompañante itálico, con esto se busca expandir la familia para ser usada en textos de lectura extensa.

[ENG] Orca BT is constructed from a mix of sharp serifs and outward brushstrokes that create a dynamic combination of angular and curved lines. Its tall x-height, moderate ascenders and descenders, as well as wide proportions make it suitable for display text and labels. The Orca BT family has a Display style and also an accompanying italic version, which is intended to make the family usable in extensive reading texts.

[ESP] Orca BT se construye a partir de una mezcla de serifas agudas y trazos pincelados de salida que crean una dinámica combinación de líneas curvas y angulares. Su altura de "x" alta, ascendentes y descendentes moderados y sus amplias proporciones la hacen adecuada para la visualización de textos y etiquetado. La familia Orca BT cuenta con un estilo Display y también un corte acompañante itálico, con esto se busca expandir la familia para ser usada en textos de lectura extensa.

[ENG] Orca BT is constructed from a mix of sharp serifs and outward brushstrokes that create a dynamic combination of angular and curved lines. Its tall x-height, moderate ascenders and descenders, as well as wide proportions make it suitable for display text and labels. The Orca BT family has a Display style and also an accompanying italic version, which is intended to make the family usable in extensive reading texts.

[ESP] Orca BT se construye a partir de una mezcla de serifas agudas y trazos pincelados de salida que crean una dinámica combinación de líneas curvas y angulares. Su altura de "x" alta, ascendentes y descendentes moderados y sus amplias proporciones la hacen adecuada para la visualización de textos y etiquetado. La familia Orca BT cuenta con un estilo Display y también un corte acompañante itálico, con esto se busca expandir la familia para ser usada en textos de lectura extensa.

[ENG] Orca BT is constructed from a mix of sharp serifs and outward brushstrokes that create a dynamic combination of angular and curved lines. Its tall x-height, moderate ascenders and descenders, as well as wide proportions make it suitable for display text and labels. The Orca BT family has a Display style and also an accompanying italic version, which is intended to make the family usable in extensive reading texts.

[ESP] Orca BT se construye a partir de una mezcla de serifas agudas y trazos pincelados de salida que crean una dinámica combinación de líneas curvas y angulares. Su altura de "x" alta, ascendentes y descendentes moderados y sus amplias proporciones la hacen adecuada para la visualización de textos y etiquetado. La familia Orca BT cuenta con un estilo Display y también un corte acompañante itálico, con esto se busca expandir la familia para ser usada en textos de lectura extensa.

[ENG] Orca BT is constructed from a mix of sharp serifs and outward brushstrokes that create a dynamic combination of angular and curved lines. Its tall x-height, moderate ascenders and descenders, as well as wide proportions make it suitable for display text and labels. The Orca BT family has a Display style and also an accompanying italic version, which is intended to make the family usable in extensive reading texts.

[ESP] Orca BT se construye a partir de una mezcla de serifas agudas y trazos pincelados de salida que crean una dinámica combinación de líneas curvas y angulares. Su altura de "x" alta, ascendentes y descendentes moderados y sus amplias proporciones la hacen adecuada para la visualización de textos y etiquetado. La familia Orca BT cuenta con un estilo Display y también un corte acompañante itálico, con esto se busca expandir la familia para ser usada en textos de lectura extensa.
